

Announcement: The “Swiss-African PhD Winter School on Innovation and Entrepreneurship for Sustainable Development” (January 22–28, 2024) is accepting applications until August 15th.

Dear PhD Students,

Sustainable development is a joint task for the world community. Insights derived from dedicated research plays an important role in achieving this task. To foster new and insightful research, we are inviting African and Swiss PhD students from the fields of innovation and entrepreneurship addressing issues of sustainable development to apply for a Winter School at Bern University of Applied Sciences Business School. The Winter School will take place from January 22–28, 2024. A maximum of 15 PhD students from Africa and 15 PhD students from Switzerland can be accepted.

This intensive program is designed to provide doctoral students in the fields of entrepreneurship and management of innovation with a unique opportunity to enhance their knowledge, skills, and network within a dynamic and supportive academic environment. It brings together PhD students and senior researchers from Africa and Europe to exchange ideas and gain new insights on relevant topics in innovation and entrepreneurship research. The Winter School focuses on research that addresses sustainable development and society's Grand Challenges.

The overarching objective is to contribute to answering the following questions:

- How can innovation and entrepreneurship help in fostering sustainable development and mitigate society's Grand Challenges?
- How can collaborative research lead to new and better insights?
- How can researchers maximize their positive impact?

The week-long event includes keynote speeches from senior researchers and expert practitioners, opportunities for participants to present and discuss their research, and a chance to network and find collaborators across continents. There will also be workshops on publishing (meet the editors) and reviewing, short courses on innovative methodologies, and a study trip to an innovation park.

Key Program Highlights

1. **Cutting-edge Research:** Explore the latest trends, theories, and methods in innovation and entrepreneurship research, and gain insights into research topics that have the potential to address Grand Challenges such as social entrepreneurship, affordable and inclusive innovation, and more.
2. **Interactive Workshops:** Participate in methods workshops focused on innovative qualitative and quantitative methods to further develop your methodological skills. Acquire essential skills and techniques necessary for advancing your research career.
3. **Peer Collaboration:** Interact with fellow PhD students from diverse backgrounds to foster a rich and vibrant intellectual community. Benefit from peer feedback, brainstorming sessions, and opportunities for interdisciplinary collaboration.
4. **Expert Mentorship:** Receive personalized guidance and mentorship from accomplished faculty members throughout the week. Gain valuable insights from their experiences and enhance your research trajectory and career prospects.
5. **Networking Opportunities:** Interact with leading scholars, entrepreneurs, and industry experts through panel discussions, guest lectures, and networking events. Build lasting connections within the entrepreneurship research community.

Application Process

To apply for the Winter School, your application must include the following documents:

- a brief letter of motivation (maximum 500 words). In the letter, please outline your research interests, your motivations for attending the winter school, and how you believe it will contribute to your academic and professional growth
- a curriculum vitae
- a letter of recommendation from a local faculty member supporting your application (e.g., your supervisor, academic sponsor)
- a 7-page description of your doctoral research. This extended abstract should identify the link to the Agenda 2063 / Sustainable Development Goals / Grand Challenges, the empirical context, the central research question, and the theoretical basis for the research, introduce the most important references and describe the methodology for data generation and analysis.

Please send your complete application package to alissa.aeberhard@bfh.ch by August 15. Successful candidates will be notified by September 15.

Financial support: For PhD students from Africa, the costs of travel, accommodation and meals are covered (according to BFH/SNSF travel regulations). The PhD students from Switzerland are responsible for financing their own stay. Participation fees for the Winter School are covered for all PhD students.

We encourage all PhD students with a keen interest in innovation and entrepreneurship research to take advantage of this exceptional opportunity. Join us at Bern University of Applied Sciences Business School for an intellectually stimulating and rewarding winter experience that will undoubtedly accelerate your journey towards becoming a leading scholar in the field of innovation and entrepreneurship.
